Paid 21 days in advance of the scheduled program	Early Bird \$295	
Final Written Assessment	\$115	
Final Practical Assessment – 1 Day	\$360	
Paid 21 days in advance of the scheduled program	Early Bird \$295	
PROGRAM TOTAL - @ Early Bird (full program)	\$2890	

THIS IS A ‘PAY AS YOU GO’ PROGRAM

If you would like to pay the full program fee ‘upfront’ @ the Early Bird price, please contact head office before doing so.

SMART BOWEN® CANINE CERTIFICATE PROGRAM – COURSE GUIDE

Module 1 – Dog Owners & Canine Certificate Program *(2 day intensive)*

Module 1 – Canine Essentials

Students learn 7 fundamental Bowen moves/sequences that make up the **Basic Body Balance**, which are commonly found within most Bowen treatments applied to dogs. A detailed manual is provided with Module 1.

The delivery of this program is based on treating dogs, all Bowen moves can be applied to cats and other small animals with equal success and some inclusion of other species will be found in the manuals.

Bowen Moves learnt in the Basic Body Balance:

1. **Lumbar/Wither Activators**
2. **Neck**
3. **Open Back**
4. **Guteals**
5. **Lattisimus Dorsi**
6. **Abdominals**
7. **Hamstrings**

Material covered within the M1 manual:

- **History of Tom Bowen** (short version)
- **History of Smart Bowen**
- **Anatomy** - foundational information on dog anatomy
- **Planning and Performing a Bowen Treatment** - covers a wide range of relevant information associated with the delivery of successful Bowen treatments.
- **OHS** – working safely around dogs and other animals
- **Bowen Moves** – each of the 7 Bowen moves/sequences that make up the Basic Body Balance are studied in detail. The muscles associated with the Bowen moves, the location, anatomical landmarks and more are covered in this section to make the application of the BBB easy to follow and understand.
- **Bowen Applications** – dogs are presented with different problems and the student will learn how they might apply all or some of the 7 Bowen moves learnt in a variety of ways.
- **Study Guide** – for general knowledge and for students continuing on into the Canine Certificate Program, a study guide is provided.

Student Outcomes

Over the 2 day training intensive the student will learn to look at their animals in an amazingly different way. Working safely around animals is important and to this effect we cover practical, common sense approaches. The student will gain general information on how to maximise the effect of the Bowen Therapy applied. An appreciation of the anatomical placement of key muscle/skeleton and other soft tissue that encompass dog anatomy will be gained whilst learning how to successfully apply the Bowen moves, formulate a treatment to facilitate health and wellbeing for their animal/s.

At the back of M1 manual a study guide is provided for the continuing education of the student. A series of questions have been asked to which the student answers by resourcing their manual. A checklist page with the answers is provided. Material covered in the study guide will be in the Final Closed Book Assessment that students must complete as part of their qualifications in the Canine Certificate Program. Point Location Chart and Questions – a further study guide is provided for the student to learn palpable point locations on the dog along with key skeletal, muscles, tendons and ligaments. In the Canine Certificate Program the student will be continually assessed on their knowledge of this material and in the Final Practical Assessment the student will need to be competent in them.

Module 2 – Canine Certificate Program

(2 day intensive)

Students learn a further 9 fundamental Bowen moves/sequences supportive to the Basic Body Balance, which are commonly found within most Bowen treatments applied to dogs. A detailed manual is provided with Module 2.

Bowen Moves learnt in M2

1. ***Closing Back***
2. ***Extra Back***
3. ***Biceps Femoris***
4. ***Girth***
5. ***Brachiocephalic***
6. ***Breathing Release***
7. ***Shoulder***
8. ***Kidney***
9. ***Tail***

Material covered within the M2 manual:

- **History of Tom Bowen** (expanded version)
- **Consultation Process**
- **Palpation Process**
- **Anatomy** - foundational information expanded
- **Bowen Moves** – each of the 9 Bowen moves/sequences are studied in detail. The muscles associated with the Bowen moves, the location, anatomical landmarks and more are covered in this section to make the application each easy to follow and understand.
- **Bowen Applications** – dogs are presented with different problems and the student will learn how they might apply the Bowen moves learnt in a variety of ways.
- **Study Guide** – for general knowledge and for students continuing into the Canine Certificate Program, a study guide is provided.
- **Case Studies** – students will be provided a booklet to fill in and return. (see Home Study).

Student Outcomes

Over the 2 day training intensive the student will build on essential knowledge aimed at assessing dogs through visual and palpation techniques. Anatomical placement of the skeleton, muscles, ligaments and tendons will be expanded upon. Students will revise the M1 Bowen moves and learn a further 9 Bowen moves to facilitate health and wellbeing for their animal/s.

At the back of M2 manual a study guide is provided for the continuing education of the student. A series of questions have been asked to which the student answers by resourcing their manual. A checklist page with the answers is provided. Material covered in the study guide will be in the Final Closed Book Assessment that students must complete as part of their qualifications in the Canine Practitioner Program. Point Location Chart and Questions – the student will be continually assessed on their knowledge of this material and in the Final Practical Assessment the student will need to be competent in them.

Module 3 – Canine Certificate Program

(2 day intensive)

Students learn a further 9 fundamental Bowen moves/sequences supportive to the Basic Body Balance and Bowen moves learnt in M1 & M2 which are commonly found within most Bowen treatments applied to dogs. A detailed manual is provided with Module 3.

Bowen Moves learnt in M3

1. **Adductor Group**
2. **Lumbar Release**
3. **Sacrum**
4. **TFL**
5. **Stifle**
6. **Legs**
7. **Spinal Processes**
8. **TMJ/Lymphatics**
9. **Relaxation Technique**

Material covered within the M3 manual:

- **Anatomy** - foundational information expanded
- **Bowen Moves** – the muscles associated with the Bowen moves, the location, anatomical landmarks and more are covered in this section to make the application each easy to follow and understand.
- **Bowen Applications** – dogs presented with different problems and the student will learn how they might apply the Bowen moves learnt in a variety of ways.
- **Case Reviews** – Students are run through various cases that have specific muscular/skeletal conditions. With the instructor, each case is reviewed and discussed in detail.
- **Meridian & Energy Systems of the Dog** – like human's dogs (cats and other animals) have Acupuncture points and Meridian pathways as well as Chakras. Students learn how to apply a **Relaxation Technique** using Bowen Therapy and other approaches to benefit the animal's health and wellbeing.
- **Study Guide** – for general knowledge and for students continuing into the Canine Certificate Program, a study guide is provided.
- **Case Studies** – students will be provided a booklet to fill in and return. (see Home Study).

Student Outcomes

Over the 2 day training intensive the student will build on essential knowledge aimed at assessing dogs through visual and palpation techniques. Anatomical placement of the skeleton, muscles, ligaments and tendons will be expanded upon. Students will revise the M1 & M2 Bowen moves and learn a further 9 Bowen moves and a Relaxation Technique to health and wellbeing for their animal/s.

At the back of M3 manual a study guide is provided for the continuing education of the student. A series of questions have been asked to which the student answers by resourcing their manual. A checklist page with the answers is provided. Material covered in the study guide will be in the Final Closed Book Assessment that students must complete as part of their qualifications in the Canine Certificate Program. Point Location Chart and Questions – the student will be continually assessed on their knowledge of this material and in the Final Practical Assessment the student will need to be competent in them.

Consolidation & Clinical Practice M1 & M2 – Canine Certificate Program

(1 day intensive)

The 2 day intensive is aimed at consolidation of all material learnt in M1 & M2.

Student outcomes:

- Assessing the student on anatomical landmarks, muscle and other soft tissue locations, palpation and assessment of dogs forms the basis of this intensive.
- An emphasis will be placed on revision and consolidation of the Bowen moves learnt from M1 & M2.
- When applicable the instructor may invite people with their dogs to come in for practice applying Bowen treatments to further their knowledge in the consultative and treatment processes attached to clinical practice.
- Mock practical assessments will be undertaken to prepare the student for the Final Practical Assessments at the end of the program for qualifying.

Consolidation & Clinical Practice M1 to M3 – Canine Certificate Program

(1 day intensive)

The 2 day intensive is aimed at consolidation of all material learnt in M1, M2 & M3

Student outcomes:

- Assessing the student on anatomical landmarks, muscle and other soft tissue locations, palpation and assessment of dogs forms the basis of this intensive.
- An emphasis will be placed on revision and consolidation of the Bowen moves learnt from M1, M2 & M3.
- Case Studies provided at M3 will be reviewed with the student.
- When applicable the instructor may invite people with their dogs to come in for practice applying Bowen treatments to further their knowledge in the consultative and treatment processes attached to clinical practice.
- Mock practical assessments will be undertaken to prepare the student for the Final Practical Assessments as the end of the program for qualifying.

HOME STUDY

Dog Anatomy & Physiology – Canine Certificate Program

(Home Study)

- **Students are required to start this module before entry into M2.**
- **Completion of this module is required before sitting the Final Closed Book Assessment.**

A comprehensive manual on dog anatomy & physiology is supplied.

- An Open Book Assessment (OBA) – primarily a question/answer booklet, accompanies the manual. Upon completion, the booklet is posted to the Smart Bowen head office for marking and then returned to the student for study purposes.
- The student is required to sit a Closed Book Assessment (CBA) by nominated assessor, on the contents of the OBA.
- Persons with prior anatomy qualifications such as vets and vet nurses or those with prior qualifications in dog/small animal anatomy may be exempt from this module.
- All other health professionals / lay persons will be required to do this module due to the specifics of dog anatomy.

Canine Case Studies (M1 & 2) – Canine Certificate Program

(Home Study)

Five dogs are selected after M2. Each dog will receive 2 Bowen treatments using Bowen moves from M1 & M2.

- Case Study booklet with templates to follow will be provided at M2 intensive.
- Case Study booklet must be filled in and returned to the instructor prior to the First - Consolidation & Clinical Practice of M1 to M2 – Canine Certificate Program.

Canine Case Studies (M3) – Canine Certificate Program

(Home Study)

Five dogs and or cats are selected after M3. Each animal will receive 2 Bowen treatments using Bowen moves from M1 to M3.

- Case Study booklet with templates to follow will be provided at M3 intensive.
- Case Study booklet must be filled in and returned to the instructor prior to the Second - Consolidation & Clinical Practice of M1 to M3 – Canine Certificate Program.

Canine Log Book – Certificate Program

(Home Study)

Log Book - 30 treatments on dogs, book to be submitted after M3

- A Log Book recording 30 Bowen treatments, signed off by the owner of each animal treatment, will be provided at the M2 intensive. Once completed the Log Book is returned to the head office of Smart Bowen.

Canine Assignment

(Home Study)

The student is required to submit a written assignment on a disease of their choice in relation to the canine form, and how that disease process may affect the dog in form and function.

Written assignment must be more than 2000 words with double spaced lines on A4 paper, references listed.

Written assignment must be returned to the Smart Bowen head office or the students instructor before the Final Practical Assessment.

Final Practical Assessment – Canine Certificate Program

(1 day intensive)

This 1 day intensive includes:

Revision

- The student will be taken through a revision of the Bowen moves learnt in M1 to M3 in preparation for the Final Practical Assessment.

The Final Practical Assessment comprises of 3 components:

- The student will be required to perform a consultative process with an owner on a dog provided for the assessment. After assessing the dog in a walkout, visual and palpation process, the student will determine the treatment to be provided and then implement the Bowen treatment. A case card provided will record the student's findings, treatment and follow up advice provided.
- The student will be provided a list of Bowen moves to demonstrate on a dog.
- Point Location – The student will be asked to identify 30 points comprising of, skeletal, muscle, tendon and ligament on the dog.
- A 70% pass is required.

Final Written Assessment – Canine Certificate Program

(Nominated Assessor)

- The student will be required to sit a Closed Book Written Assessment (CBWA) by nominated assessor at a time convenient to both student and assessor.
- The Closed Book Written Assessment (CBWA) 3 hours is allotted for the assessment.
- The nominated assessor will receive the paper via mail and return via mail to the head office of Smart Bowen for marking. A 70% pass is required.

Upon completion of all the required elements, the student will receive the:

Certificate Canine Smart Bowen® Therapy
